**ASIMUT is the only online information and planning system tailor made for schools of music, drama and arts.**

ASIMUT is created specifically to handle your unique and complex timetabling and planning challenges.

You can access the system on the internet at any time and from any device such as your computer, tablet or smartphone.

ASIMUT is so simple that your students and professors will start using it without any introduction.

*"Life before ASIMUT is almost as inconceivable as life before the internet. I don't think we could have it another way now."*

*Gene Marshall, Student President  
at the Royal College of Music, London.*

## Effective scheduling tools

Schedule a class for an entire semester with one click and be immediately alerted of any double bookings. ASIMUT provides you with a range of effective tools, enabling you to handle the complex scheduling of academic classes, individual tutoring, ensemble rehearsals and public performances. ASIMUT has proven its worth by years of successful use at the world's best schools.

## Online room booking

With ASIMUT, your students and professors can easily find and book available rooms online, while customised rules ensure fair and equal access - no more endless queues of students waiting for a practice room.

## Powerful event management

ASIMUT helps you keep track of venue bookings and all the details of each event. It will ensure that everyone involved always knows exactly what needs to be done and is kept up to date when something changes.

*"We're a school with eleven different educations. Trying to make it all connect is a big challenge, and ASIMUT really helps us to get an overview. We can't work without it now!"*

*Mark Hollier, Coordinator of Studies at the Danish National School of Performing Arts, Copenhagen.*

*"We chose ASIMUT because it was the only system that could be easily adapted to our administrative processes. We still do things in our own way, it's just faster and simpler with ASIMUT."*

*Jan Landsaat, ICT Project Manager  
at Willem de Kooning Academy, Rotterdam.*

## Flexibility & adaptability

ASIMUT can be tailored exactly to your school's specific needs and traditions.

It is scalable to meet the demands of both small and very large institutions - custom made booking rules, tailored overviews and a range of individual adaptations make it fit to every school's unique setting.

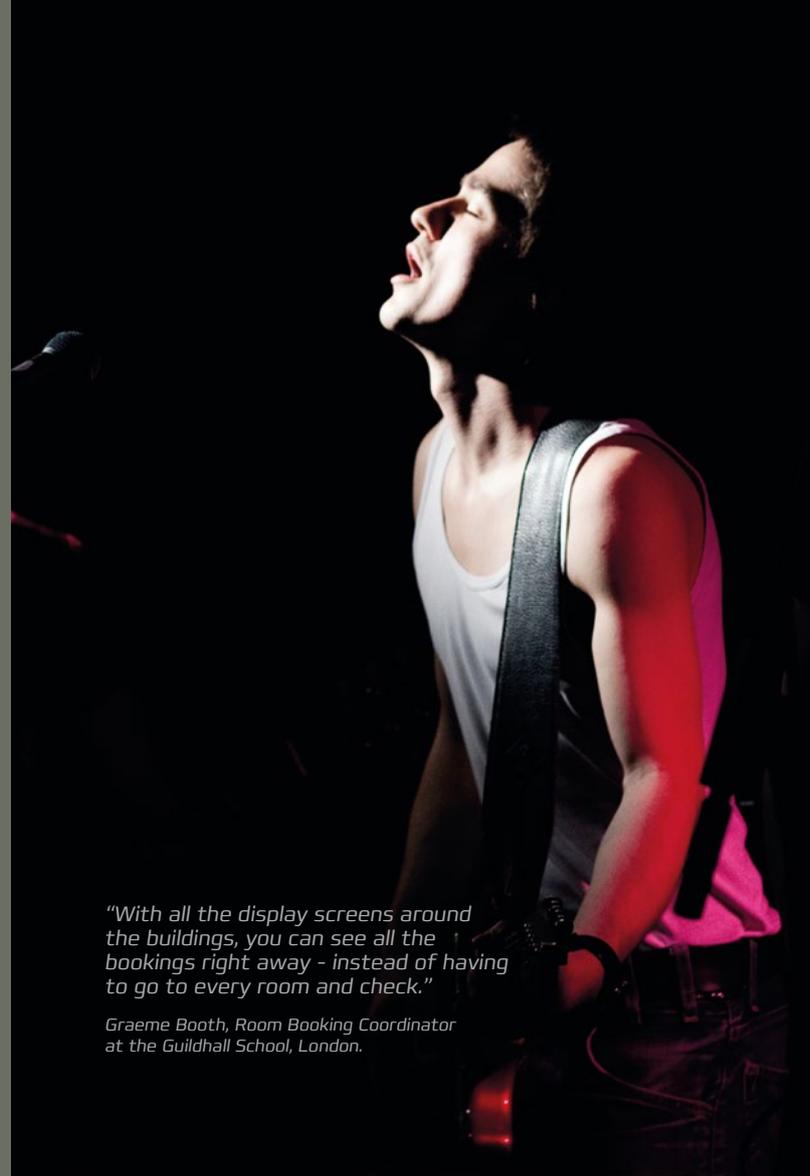

The system can be integrated with your school's website and intranet, as well as with other existing systems like student registry and CMS systems.

## Direct communication

ASIMUT allows everybody at your school to communicate directly through the system.

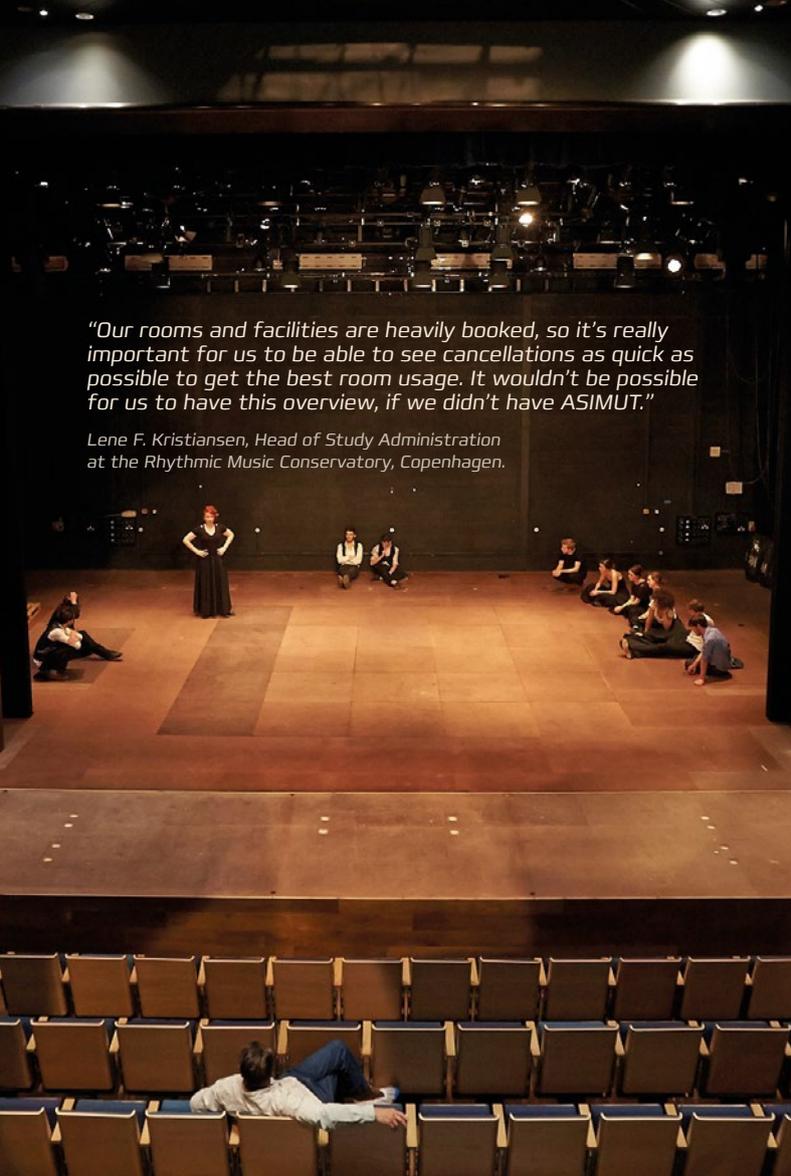

Students and staff can check the most recent information on their computers and smartphones and are always kept up to date - no matter where or when.

Important information can be displayed on info screens installed at the school so that it is available to everybody at a glance.

*"With all the display screens around the buildings, you can see all the bookings right away - instead of having to go to every room and check."*

*Graeme Booth, Room Booking Coordinator at the Guildhall School, London.*

## Efficient usage of spaces

With ASIMUT you get a range of possibilities to optimise the usage of your resources.

Unconfirmed bookings get cancelled automatically so students can make last minute bookings.

Every change is reflected in real time, so you can react quickly whenever resources are available.

The improvement in room usage will be instantly reflected in the built-in usage statistics.

## Easy implementation

Having years of experience, we know how to make the implementation as smooth and as fast as possible.

ASIMUT is a fully hosted native web application, so you will enjoy high system availability without having to worry about local maintenance or client software.

For support questions, you can always rely on our multinational support team.

*"The implementation process went really smooth and very fast. Since ASIMUT is a cloud based system, it has never failed - we never had to worry about it."*

*Jordi Varela, IT manager at Escola Superior de Música de Catalunya, Barcelona.*
